

Orange Star Headquarters instructions

step 1

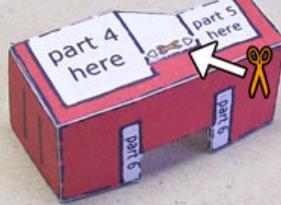

All you need to build your own papercraft OS HQ, are the parts (preferably printed on thicker paper), glue, a knife, a cutting mat and maybe some extra tools like a toothpick.

step 2

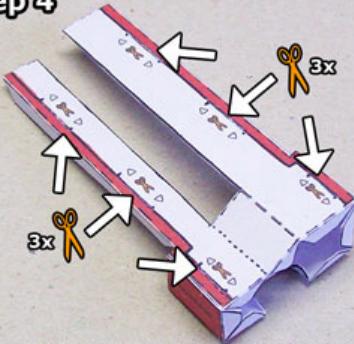

Cut out and assemble the top of part 1, and fold and pre-shape the sides according to the fold lines, but DON'T score or fold the bigger glueing tabs!

step 3

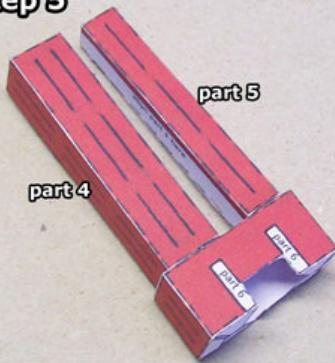

Next, cut out and assemble part 2 (don't forget to cut the small slit as indicated on the template!)

step 4

Cut out the 6 small slits on part 3. Fold and pre-shape it, and glue it to the back of part 2.

step 5

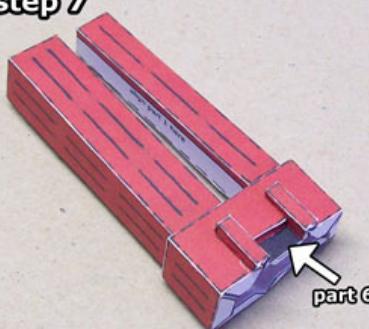

Cut out and assemble parts 4 and 5, and then glue them on top of part 2 and to the back of part 3 as shown here.

step 6

Take your time to assemble part 6 as shown here, by paying close attention to the valley and mountain folds.

step 7

Push part 6 inside the hole at the bottom of part 2 until you can glue the two "columns" to the walls as shown here.

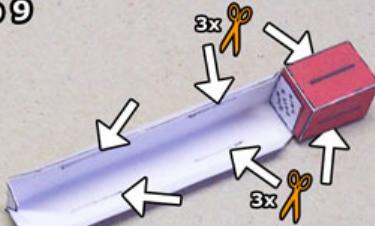

Step 8

Now push the short side of part 1 between the two "towers" on parts 2-6, pushing the glueing tab at the bottom through the slit.

Push the three glueing tabs on either side of part 1 through the slits on the back of parts 2-6 as well, so the parts are shaped and locked in place automatically.

Step 9

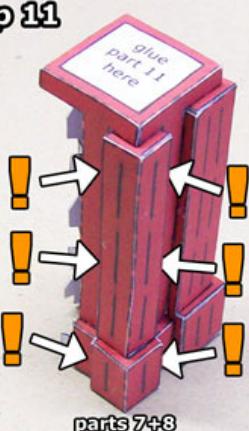

Next, cut out and assemble part 7 as shown here, and don't forget to cut out the 6 slits again!

Step 10

Step 11

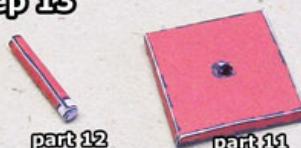

...and then glue parts 7+8 it to the rest of the HQ by pushing the glueing tabs on part 1's sides through the slits again.

Step 12

Do the same for parts 9+10 (don't forget to cut the 6 small slits!) on the last corner.

Step 13

Cut out and assemble part 11 and roll up and glue part 12 as tight as possible as shown here...

Step 14

...and then glue them on top of the HQ like so.

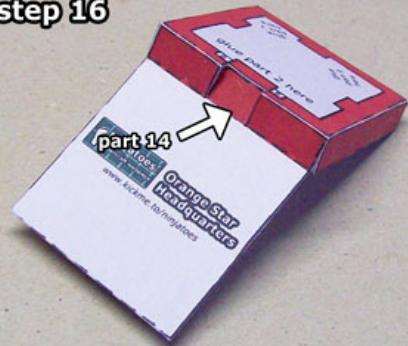

Step 15 part 13

Cut out the hole on part 13 and assemble it as shown here, but DON'T close the bottom yet!

First, pre-shape part 14 (see the valley folds!)...

Step 16

...and glue it over the hole on part 13 from the inside like so.

step 17

Now you can close the bottom of part 13, and glue the base to the bottom of the building.

Thank you for building a Ninjatoes' papercraft model!
